In with  
the new!

## 2021 Patio door hardware

---

Introducing our new collection of handles designed to match today's architectural trends. Their simple rectangular designs are minimalist enough to blend in with any decor.

Most of our doors will now come standard with the new **Look** handle designed by Novatech. It features straight lines and sharp angles for a sleek contemporary style yet has gentle curves where needed for a comfortable hold when gliding the door open.

The new **View** handle is our high end option. Taller and larger, it is particularly well suited for 8 foot high, wide panel doors and comes in a range of finishes that will add character and prestige.

NEW

**9600** Standard for **630**
